

hello?
hello?

Did you know...

There are no sounds in space. This is because there is no air for sound waves to travel through. Without air, water or solid particles to vibrate, there is no noise. So, in space, astronauts talk to each other by radio.

Because of our atmosphere it looks like stars are **twinkling**. Some stars are so far away, when we see them they may be thousands or millions of years old, or may no longer exist.

The earth is the **3rd** planet from the sun.

The temperature at the sun's surface is about **11,000°F**.

PLANET UnScRAMBLE

There are 9 planets around the sun. Can you unscramble all of them.

EURRCMY _____

EUNVS _____

AEHTR _____

ASRM _____

You made it!

Orbital Journey!

Rocket Boy has no radio, help him get to the other side of Saturn.

Ask your teacher: Some scientists say Pluto is not a planet, what does your teacher say?

Lost in Space...

C	W	P	B	S	T	A	R	S	V
S	P	A	C	E	R	S	P	V	R
A	U	L	F	G	F	U	E	L	O
